18. TO THE BEST OF MY KNOWLEDGE AND BELIEF, ALL DATA IN THIS APPLICATION/PREAPPLICATION ARE TRUE AND CORRECT. THE DOCUMENT HAS BEEN DULY AUTHORIZED BY THE GOVERNING BODY OF THE APPLICANT AND THE APPLICANT WILL COMPLY BY THE ATTACHED ASSURANCES IF THE ASSISTANCE IS AWARDED.			
a. Typed Name of Authorized Representative James W. Holsinger, Jr. M.D.		b. Title Cabinet Secretary	c. Telephone Number 502-564-7042
d. Signature of Authorized Representative		e. Date Signed	

FORM 2
MCH BUDGET DETAILS FOR FY 2006

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: KY

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 11,890,984

A.Preventive and primary care for children:

\$ 7,741,031 (65.1%)

B.Children with special health care needs:

\$ 4,149,953 (34.9%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 0 (0%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 36,006,800

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 36,975,138

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 0

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 22,552,700

\$ 72,981,938

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 84,872,922

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 45,400

c. CISS: \$ 900

d. Abstinence Education: \$ 1,094,600

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 87,690,400

h. AIDS: \$ 0

i. CDC: \$ 7,381,800

j. Education: \$ 5,423,119

k. Other: \$

Primary Care Coop \$ 151,300

Title X \$ 6,226,400

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 108,013,919

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 192,886,841

Field Note:

2. **Section Number:** I. Federal-State MCH Block Grant Partnership

Field Name: Children_0_1Budgeted

Row Name: Infants <1 year old

Column Name: Budgeted

Year: 2005

Field Note:

Several projects which were previously included under this category have been moved to the CSHCN column. The patients served under these projects have not changed but as KEIS is now within the Department for Public Health, additional funding for children with developmental delays has been included in the DPH budget. Additionally, several contracts usually put under this category now seem to fit more reasonably under the CSHCN although they remain with the ACH Division. Lorie Chesnut 6/04.

5. **Section Number:** I. Federal-State MCH Block Grant Partnership

Field Name: CSHCNBudgeted

Row Name: CSHCN

Column Name: Budgeted

Year: 2005

Field Note:

In the past years, this category has only included funding allocated by the Commission for Children with Special Health Care Needs. At that time, the Kentucky Early Intervention Program was also within the CSHCN agency (which receives a portion of Title V funding but which is, officially, an agency separate from the Department for Public Health).

In 2004, KEIS has been moved to the Department for Public Health, Division of Adult and Child Health. Now, the reader will note that the CSHCN column is considerably higher in 2005 than in past years. In 2005, an estimated \$ 11,709,600 in state general funds will be used under the KEIS program. I have also included any contracts funded by state funds (or Title V funds) which are under the direction of Germaine O'Connell (such as the "Infant Intensive Care Program") falling under this category. Lorie Chesnut 6/04.

FORM NOTES FOR FORM 11

The YRBS is only conducted in odd years and the data is not available.

FIELD LEVEL NOTES

1. Section Number: Performance Measure #1

Field Name: PM01

Row Name:

Column Name:

Year: 2002

Field Note:

Data reporting for 2001 for this measure has been improved over past years. Prior years did not note births by occurrence; rather reported was resident births.

The new total of 94.5 percent represents a far more accurate account of total births in Kentucky, total numbers of children screened. Data collection and the annual indicator for this measure will continue to improve in the future as additional resources are directed to Kentucky's Newborn Screening Program.

2. Section Number: Performance Measure #2

Field Name: PM02

Row Name:

Column Name:

Year: 2002

Field Note:

The 2002 indicator is based on the State estimates from SLAITS.

3. Section Number: Performance Measure #2

Field Name: PM02

Row Name:

Column Name:

Year: 2003

Field Note:

For the report due on July 15, 2004, the denominator reflects those children 0-21 enrolled in Kentucky's CSHCN program receiving medical services; this program does not provide services to the larger number of children that could be identified in the state using MCHB's broader definition of CSHCN. The numerator reflects those patients 0-21 receiving medical services whose families have participated with their treatment team in identifying and resolving issues related to the patient's health and independence. This number is expected to increase as the requirement for staff to enter this information electronically was initiated during FY 2003.

4. Section Number: Performance Measure #2

Field Name: PM02

Row Name:

Column Name:

Year: 2004

Field Note:

The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.

5. Section Number: Performance Measure #3

Field Name: PM03

Row Name:

Column Name:

Year: 2002

Field Note:

The 2002 indicator is based on the State estimates from SLAITS.

A data snapshot taken on 1/22/03 showed that 95.36% of Commission enrollees in the state were linked to a medical home as indicated by a Primary Care Physician listed in the individual medical record. This is considerably higher than the SLAITS survey information for KY showing 55.6% of cshcn reporting coordination of comprehensive care within a medical home and reflects the impact that the agency does have with its' targeted population of children with specific physical diagnoses.

6. Section Number: Performance Measure #3

Field Name: PM03

Row Name:

Column Name:

Year: 2003

Field Note:

For the report due on July 15, 2004, the denominator reflects those children 0-21 enrolled in Kentucky's CSHCN program receiving ongoing services; this program does not provide services to the larger number of children that could be identified in the state using MCHB's broader definition of CSHCN. The numerator reflects patients 0-21 receiving ongoing services who have identified a health care provider whom they see for their primary care.

7. Section Number: Performance Measure #3

Field Name: PM03

Row Name:

Column Name:

Year: 2004

Field Note:

The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.

8. Section Number: Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2002

Field Note:

The 2002 indicator is based on the State estimates from SLAITS.

As with the performance measure related to cshcn linkage to a medical home, the % of Title V/CSCHN enrollees with insurance coverage is significantly higher (91.18% in FY02) than the % reported for the general population of KY cshcn in the SLAITS survey (56.6.%)

9. Section Number: Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2003

Field Note:

For the report due on July 15, 2004, the denominator reflects those children 0-21 who accessed services through Kentucky's CSHCN program; this program does not provide services to the larger number of children that could be identified in the state using MCHB's broader definition of CSHCN. The numerator reflects those children 0-21 accessing services who have Medicaid insurance, with and without private insurance, since they could access their required care without being enrolled in the CSHCN program.

10. **Section Number:** Performance Measure #4
Field Name: PM04
Row Name:
Column Name:
Year: 2004
Field Note:
The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.
11. **Section Number:** Performance Measure #5
Field Name: PM05
Row Name:
Column Name:
Year: 2002
Field Note:
The 2002 indicator is based on the State estimates from SLAITS.
12. **Section Number:** Performance Measure #5
Field Name: PM05
Row Name:
Column Name:
Year: 2003
Field Note:
For the report due on July 15, 2004, the denominator reflects those children 0-21 enrolled in Kentucky's CSHCN program receiving medical services; this program does not provide services to the larger number of children that could be identified in the state using MCHB's broader definition of CSHCN. The numerator reflects those patients 0-21 receiving medical services whose families receive ongoing care coordination assistance with accessing community resources and additional specialty health care. This number is expected to increase as the requirement for staff to enter this information electronically was initiated during FY 2003.
13. **Section Number:** Performance Measure #5
Field Name: PM05
Row Name:
Column Name:
Year: 2004
Field Note:
The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.
14. **Section Number:** Performance Measure #6
Field Name: PM06
Row Name:
Column Name:
Year: 2002
Field Note:
Because only one of the States (Maine) met the NCHS standards for reliability for PM 6, the 2002 indicator is the national average except for Maine which has its State value noted.
- Since 1999, the Commission's Health and Ready to Work Grant, the Kentucky Youth Transitioning to Employment and Comprehensive Healthcare Project (KY TEACH) has provided support for collaboration with a variety of organizations to increase community awareness of the significance of a medical home for individuals with special needs, to encourage yshcn to complete their high school education and seek further education or vocational training and to prepare youth to enter adulthood as individuals "healthy and ready to work".
- KY TEACH entered the 3rd of its 4-year award period during FY 2001. The grant has allowed the Commission to become a national leader in transition services. Highlights and successes of the grant include: 1) institutionalization of transitions into agency organization and function through administrative reorganization and appointment of transition liaisons in each of the regional offices; 2) developing electronic capacity to track data on enrollees linkage to their medical homes; 3) collaborating with family and independent living organizations to increase the probability that families and youth with special health care needs (yshcn) can manage successful transition of yshcn to adult health care, work, and participation in the community; and 4) developing relationships with a variety of organizations to improve workforce participation by yshcn, offering individual coaching and group training to teens and supporting youth in paid work experiences.
15. **Section Number:** Performance Measure #6
Field Name: PM06
Row Name:
Column Name:
Year: 2003
Field Note:
For the report due on July 15, 2004, the denominator reflects those youth 15-21 enrolled in Kentucky's CSHCN program receiving medical services; this program does not provide services to the larger number of youth that could be identified in the state using MCHB's broader definition of CSHCN. The numerator reflects those patients 15-21 receiving medical services who have discussed plans for accessing adult health care providers (primary, specialty, dental, DME, pharmacy, therapy, and mental health). This number is expected to increase as the requirement for staff to enter this information electronically was initiated during FY 2003.
16. **Section Number:** Performance Measure #6
Field Name: PM06
Row Name:
Column Name:
Year: 2004
Field Note:
The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.

Population data for 2002 is not available.
22. **Section Number:** Performance Measure #9
Field Name: PM09
Row Name:
Column Name:
Year: 2003
Field Note:
Oral Health Staff expect this performance measure to be accurately measured in future years with the development of the Children's Oral Health Surveillance System which will provide ongoing data to track the status of children's oral health within Kentucky.
23. **Section Number:** Performance Measure #10
Field Name: PM10
Row Name:
Column Name:
Year: 2002
Field Note:
Data for 2002 is not available and will not be available until spring/summer of 2004. 2001 Data is still provisional. For this reason, annual performance objectives have not been altered. We would prefer to wait until 2001 data is final.
24. **Section Number:** Performance Measure #11
Field Name: PM11
Row Name:
Column Name:
Year: 2002
Field Note:
Data for 2002 is not yet available.
25. **Section Number:** Performance Measure #12
Field Name: PM12
Row Name:
Column Name:
Year: 2002
Field Note:
For the report due on July 15, 2003 , the denominator used for this measure is the number of UNHS forms received during the state fiscal year (7/1/01-6/30/02), and does not reflect total number of births in Kentucky. Information will be revised using the number of births later this year when that information becomes available from the state's Vital Statistics. Note that KY regulations for UNHS require only those hospitals that have at least 40 births per year to perform and report newborn hearing screens. This means a small number of infants born at home or in a non-reporting hospital will not be included in the report. It is not anticipated that the performance indicator will rise above 98% as some families do choose not to have the screening and, more often, hospital screening equipment may not be functioning so some infants are scheduled for screening as soon as possible after discharge.
26. **Section Number:** Performance Measure #12
Field Name: PM12
Row Name:
Column Name:
Year: 2003
Field Note:
For the report due on July 15, 2004, the denominator does not reflect total number of live births in Kentucky. The number reflects the total number of newborn hearing screening reports received from those hospitals mandated to provide a report on all newborns prior to discharge during the 2003 calendar year. Kentucky regulations require only those hospitals that have at least 40 births per year to perform and report newborn hearing screenings. This means infants born at home or in a non-reporting hospital are not mandated to be screened. It is not anticipated that the performance indicator will rise above 99% for those newborns who are required to be screened due to some families choosing not to have the screening and more frequently because hospital screening equipment may not be functioning prior to the infant's discharge. If the newborns that are not required to be screened are included in the denominator, the target performance indicator is not expected to exceed 94%. Between 1999 and 2003, hearing screening reports were provided for an average of 89.96% of all live births; the percentage in 2002 was 91.52% and the provisional percentage in 2003 was 93.71% of all live births.

 Denominator Data is Population Estimates from 2002 - Kentucky State Data Center

 Neglect/Abuse Data from Mary Glasscock (CHFS OIT DAB)
38. **Section Number:** State Performance Measure #5
Field Name: SM5
Row Name:
Column Name:
Year: 2002
Field Note:
 Accurate data for this measure has proven difficult to obtain.

 In the initial roll-out year of HANDS, 15 counties were selected to participate in a pilot program. These counties tended to be areas of highest need; with small populations scattered within a rural setting. In many cases, half of the population was supported through government assistance. Several of these counties were located in Eastern Kentucky; the foothills of the Appalachian Region.

 Because of this, the percentage of participation in HANDS was extremely high in the first year.

 In subsequent years, as additional counties participate with higher populations and proportionally less need, it is expected that the state-wide percentage of participation will decline. But the resulting portion of the population that does participate will represent the true need for the state rather than a skewed picture focusing on a few counties.

41. Section Number: State Performance Measure #6

Field Name: SM6

Row Name:

Column Name:

Year: 2003

Field Note:

Kentucky Pediatric Nutrition Surveillance Data for each year:

1999 13.3 Overweight and 6.4 Underweight

2000 13.4 Overweight and 6.2 Underweight

2001 14.1 Overweight and 5.8 Underweight

2002 16.8 Overweight and 4.6 Underweight

Source: Nutrition Services Branch (Emma Walters, primary contact).

Note: Projected totals for future years are based on realistic assumptions regarding the health problem that Kentucky faces with obesity in our youth. We hope that our estimates are proved wrong and that numbers decline more quickly for future years. The many partners working toward this goal remain optimistic but chose to project cautiously into the future.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: KY FY: 2006

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce the rate of substantiated incidence of child abuse, neglect or dependency.
2. Reduce the percent of children with inappropriate weight for height.
3. Reduce the percentage of women who smoke during pregnancy.
4. Increase the percentage of Medicaid enrolled members ages 0-21 who are continuously enrolled and who had at least one dental visit during the reporting year.
5. Decrease the rate of Birth Defect Specific Infant Mortality in Kentucky.
6. Decrease the death rate for children age 0-18 due to unintentional injury and/or violence.
7. Reduce the percentage of live births that are preterm.
8. Percentage of women of childbearing age who receive preconceptual care in the local health department.
9. Increase the number of children and youth with special health care needs who successfully transition from school to the community.
10. Expand and improve the CSHCN infrastructure, e.g. CUP, through interfaces with other statewide data collection systems.

FORM NOTES FOR FORM 15

None

FIELD LEVEL NOTES

None

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: KY

SP # 1

PERFORMANCE MEASURE:

Percent of women of childbearing age taking folic acid regularly.

STATUS:

Active

GOAL

Reduce the occurrence of neural tube defects.

DEFINITION

KBRFS is the Kentucky Behavioral Risk Factor Survey.

Numerator:

Number of women between the ages of 18 and 44 responding "yes" to the KBRFS Folic Acid Module question: "Are any of these a multivitamin" plus the number of women answering "yes" to the question "Do any of the vitamin pills or supplements you take contain folic acid."

Denominator:

Number of women between the ages of 18 and 44 responding to the KBRFS Folic Acid Module questions.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The Kentucky Behavioral Risk Factor Survey, Center for Disease Control and Prevention, Folic Acid Module. The Folic Acid Module was deleted from the KBRFS for 1998, due to the inclusion of other categorical questions and need to balance number of survey questions for that year. The Folic Acid Module has been reinstated into the KBRFS for 1999.

SIGNIFICANCE

Studies have demonstrated that consumption of folic acid preconceptionally and during early pregnancy reduces the frequency of neural tube defects by an estimated 50-70 percent. The US Public Health Service recommends to reduce the number of neural tube defects by encouraging all women of childbearing age to consume 0.4 mg or 400 micrograms of folic acid daily.

SP # 2

PERFORMANCE MEASURE:

Percent of counties with comprehensive child safety education and injury prevention programs in place.

STATUS:

Active

GOAL

Reduce child morbidity and mortality related to intentional and unintentional injuries.

DEFINITION

Continuing child safety education and injury prevention programs include age-appropriate counseling on safety precautions to prevent unintentional injuries. The word "comprehensive" safety education has been re-defined as a plan that concentrates solely on unintentional injury and conducts multifaceted injury prevention activities emphasizing problems afflicting high-risk populations in the area. This will be achieved by teaching from curricula for the particular audience and the injury cause such as Safe Communities, Safe Sitters, Risk Watch, Buckle Up, and CPR.

Numerator:

Number of counties that have comprehensive child safety education and prevention activities.

Denominator:

Number of Kentucky counties--(120).

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Program data from the Resource Persons program; Injury Prevention Program, Kentucky Safe Kids Coalition, Kentucky Child Fatality Review Team, Kentucky Injury Prevention and Research Center all have data on existing county child safety education and injury prevention programs. Data will reflect organized, continuing county activities.

SIGNIFICANCE

Injuries are the leading cause of death for children in Kentucky after the first year of life. Any efforts to reduce child deaths and disabilities must incorporate a strong community based effort. Assuring community based efforts will have a positive impact on reducing injuries for children.

SP # 4

PERFORMANCE MEASURE:

Rate of substantiated incidence of child abuse, neglect, or dependency.

STATUS:

Active

GOAL

Decrease the rate of substantiated incidence of child abuse, neglect, or dependency.

DEFINITION

Child abuse, neglect and dependency, as defined by the Kentucky Cabinet for Families and Children, Department for Social Services.

Numerator:

Number of substantiated reports of child abuse, neglect or dependency to children under 18 years of age in Kentucky.

Denominator:

Number of children under the age of 18 in Kentucky.

Units: 1000 **Text:** rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Department for Social Services Health Data Branch, Vital Statistics The most recent data from 1996. Data and estimates have been revised accordingly to reflect these changes.

SIGNIFICANCE

Recent research has determined that families in today's society face increasing stress due to teen pregnancy, substance abuse, domestic violence, poverty, isolation, unemployment and lack of adequate education. In many cases it is the most vulnerable family member--the child--who may become the target of the parent's anger and frustration. Substantiation of cases of abuse, neglect and/or dependency is the first step to implementing strategies to reduce further incidences.

SP # 5

PERFORMANCE MEASURE:

Number of families receiving support services/parenting assistance through the HANDS (Health Access Nurturing Development Services) home visiting support program.

STATUS:

Active

GOAL

Increase the number of families receiving support services/parenting assistance through implementation of a home visiting support project in participating counties (HANDS).

DEFINITION

Home visiting support services/parenting assistance are provided to enrolled families during pregnancy and until the child is two years of age.

Numerator:

The number of families receiving home visiting support services/parenting assistance in the participating HANDS counties.

Denominator:

No denominator - showing actual number of families.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

HANDS outcome measures data. Current research indicates that approximately 20% of families are considered "at risk" at the time of the birth of a child.

SIGNIFICANCE

Many families in today's society face stresses that make it difficult to cope even under "good" circumstances. Adding one more stress factor (such as history of substance abuse and/or depression, isolation, unemployment, poverty, less than high school education, late or no prenatal care, history of domestic violence), in addition to becoming a new parent, can be overwhelming. Research has shown that providing home visiting support services/parenting assistance to overburdened families close to the birth of their child is successful in reducing levels of physical and emotional abuse and neglect.

SP # 6

PERFORMANCE MEASURE:

Percent of children with inappropriate weight for height.

STATUS:

Active

GOAL

Decrease the percent of children within appropriate weight for height.

DEFINITION

Appropriate weight for height is between the 5th and 95th percentile in weight for height.

Numerator:

The number of children who have a weight for height of below the 5th percentile and the number of children who have a weight for height of above the 95th percentile.

Denominator:

The total number of children with measurements reported to the Centers for Disease Control and Prevention through Pediatric Nutrition Surveillance.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Data Pediatric Nutrition Surveillance

SIGNIFICANCE

National surveys for the last thirty years document a significant increase in obesity among the United States population. Obesity increases the risk for diabetes, heart disease, hypertension, arthritis, and other causes of death and disability. Maintaining appropriate weight for height during childhood can decrease complications of childhood conditions and reduce the risks of developing chronic conditions in adulthood.

SP # 7

PERFORMANCE MEASURE:

Percent of counties who review child deaths with a local multidisciplinary investigation team.

STATUS:

Active

GOAL

Increase the percent of counties undergoing a local child fatality review to identify factors for developing strategies for reducing future child deaths.

DEFINITION

Child death means deaths for children from birth through 17 years of age. Unexpected or unexplained child deaths, as defined by Kentucky Revised Statute.

Numerator:

Number of counties with existing multidisciplinary investigation teams to review unexpected or unexplained child deaths and reporting to the Department for Public Health.

Denominator:

Total number of counties in Kentucky who should have existing multidisciplinary investigation teams to review unexpected or unexplained child deaths and reporting to the Department for Public Health.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Kentucky Vital Statistics, Death Certificates, 1997 Calendar year Kentucky Coroner Report Forms

SIGNIFICANCE

Each year 700 to 800 Kentucky children under the age of 18 die. Too many die from causes such as motor vehicle collisions, fire burns, drownings, abuse and neglect, and Sudden Infant Death Syndrome, which have associated preventable risk factors. Local multidisciplinary review and data collection can lead to improved information that enhances identification and leads to identification of prevention strategies to reduce the number of future child deaths.

SP # 12

PERFORMANCE MEASURE:

Percentage of Medicaid enrolled members ages 0 through 21 who were continuously enrolled during the reporting year and who had at least one dental visit during the reporting year.

STATUS:

Active

GOAL

To increase access to oral health services for Medicaid-eligible children.

DEFINITION

Numerator:

The number of children in the denominator, ages 0 through 21, who have had one or more dental visits during the reporting year.

Denominator:

All Medicaid members ages 0 through 21 as of December 31st of the reporting year who were members as of December 31 of the reporting year and were continuously enrolled for the reporting year. Members who have had no more than one break in enrollment of up to 45 days during the reporting year should be included in this measure.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Data will be collect through the HCFA reporting system. Information on HCFA dental codes used for this measure are available on pages 92 - 93 of the HEDIS 3.0, Volume 2 - January 1997.

SIGNIFICANCE

The utilization of dental services by Medicaid eligible children has reached a critical level in Kentucky. Many of those children who have services available to them are not using these services. This problem is related to many factors including lack of Medicaid dental providers, inadequate reimbursement rates, client no-shows and a lack of knowledge among parents about the role of preventive care and how to access this benefit.

SP # 13

PERFORMANCE MEASURE:

The proportion of young people who have smoked cigarettes within the past 30 days.

STATUS:

Active

GOAL

Reduce the percent of young people who have smoked during the past 30 days.

DEFINITION

The YRBS was developed by CDC to monitor priority health risk behaviors that contribute to the leading causes of mortality, morbidity and social problems among youth. This measure addresses the YRBS question: During the past 30 days, on how many days did you smoke cigarettes.

Numerator:

Number of students in the 9th-12th grades who responded that they smoked at least one or more days during the past 30 days.

Denominator:

Number of students in the 9th-12th grades who responded to the smoking question.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The Kentucky Behavioral Risk Factor Survey. At times the response rate may not be sufficient to guarantee statistical validity and the survey is administered every other year both leading to some concerns about this source of data.

SIGNIFICANCE

The 1997 Youth Risk Behavior Survey states that tobacco use is the single most preventable cause of death in the United States, accounting for more than one of every five deaths. In addition, smoking is related to poor academic performance and the use of alcohol and other drugs.

Note: The reason provided by Medicaid for the decrease is lack of access to care and changes based on HIPAA compliance using local codes. The Oral Health Program will be exploring this further during FY06. Lorie Wayne Chesnut 7/1/05

7. **Section Number:** Health Systems Capacity Indicator #08
Field Name: HSC08
Row Name:
Column Name:
Year: 2003
Field Note:
For the report due on July 15, 2004, the denominator reflects an average number of youth under the age of 16 years old who received SSI during the federal fiscal year of 2003. The only data available from the Social Security Administration (SSA) is a monthly count. The twelve months were averaged to determine the number of recipients. However, the numbers provided from the SSA do not provide any details on how many recipients were receiving benefits for the first time during the month reported and how many were carried over from the month before. It is expected that the denominator is in fact higher than reported, but at this time there is no data available to provided the actual number. The numerator for this measure is significantly lower than in previous years due to the discontinuation of the Disabled Children's Program that provided additional services to this population. The amount of funding available for the services provided, such as purchasing a window air condition unit for a child with asthma, has been significantly reduced and is now only available for services that are medically necessary.
8. **Section Number:** Health Systems Capacity Indicator #08
Field Name: HSC08
Row Name:
Column Name:
Year: 2004
Field Note:
Though the Commission no longer offers separate programming for children receiving SSI benefits we will continue to document services to SSI eligible children and youth who qualify for services in the CSHCN medical program. The Commission will also continue to partner with the Social Security Administration and Disability Determination Services to provide outreach and referral information to families who apply for SSI disability benefits for children or youth under age 16. Families of young SSI recipients and youth under age 16 who receive SSI benefits may contact the Commission at 1-800-232-1160 or by email from the agency website: CSHCNWebPage@ky.gov, for assistance in locating resources to meet medical or rehabilitative needs that are not covered under Title XIX-Medicaid. The Commission served 8.19% (1,631) of children and youth under age 16 who receive SSI benefits in Kentucky.

STATE: KY

SP # 1

PERFORMANCE MEASURE: Decrease the death rate for children age 0-18 due to unintentional injury and/or violence.

GOAL

DEFINITION

Numerator:

Denominator:

Units: Text: 0

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES Vital Statistics

SIGNIFICANCE

OBJECTIVE

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 2

PERFORMANCE MEASURE:

Rate of substantiated incidence of child abuse, neglect, or dependency.

GOAL

Decrease the rate of substantiated incidence of child abuse, neglect, or dependency.

DEFINITION

Child abuse, neglect and dependency, as defined by the Kentucky Cabinet for Families and Children, Department for Social Services.

Numerator:

Number of substantiated reports of child abuse, neglect or dependency to children under 18 years of age in Kentucky.

Denominator:

Number of children under the age of 18 in Kentucky.

Units: 1000 **Text:** 2

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Department for Social Services Health Data Branch, Vital Statistics The most recent data from 1996. Data and estimates have been revised accordingly to reflect these changes.

SIGNIFICANCE

Recent research has determined that families in today's society face increasing stress due to teen pregnancy, substance abuse, domestic violence, poverty, isolation, unemployment and lack of adequate education. In many cases it is the most vulnerable family member--the child--who may become the target of the parent's anger and frustration. Substantiation of cases of abuse, neglect and/or dependency is the first step to implementing strategies to reduce further incidences.

OBJECTIVE

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 3

PERFORMANCE MEASURE:

Percent of children with inappropriate weight for height.

GOAL

Decrease the percent of children within appropriate weight for height.

DEFINITION

Appropriate weight for height is between the 5th and 95th percentile in weight for height.

Numerator:

The number of children who have a weight for height of below the 5th percentile and the number of children who have a weight for height of above the 95th percentile.

Denominator:

The total number of children with measurements reported to the Centers for Disease Control and Prevention through Pediatric Nutrition Surveillance.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Data Pediatric Nutrition Surveillance

SIGNIFICANCE

National surveys for the last thirty years document a significant increase in obesity among the United States population. Obesity increases the risk for diabetes, heart disease, hypertension, arthritis, and other causes of death and disability. Maintaining appropriate weight for height during childhood can decrease complications of childhood conditions and reduce the risks of developing chronic conditions in adulthood.

OBJECTIVE

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 4

PERFORMANCE MEASURE:

Percentage of continuously enrolled Medicaid members ages 0 through 21 who had at least one dental visit during the reporting year.

GOAL

To increase access to oral health services for Medicaid-eligible children.

DEFINITION

Numerator:

The number of children in the denominator, ages 0 through 21, who have had one or more dental visits during the reporting year.

Denominator:

All Medicaid members ages 0 through 21 as of December 31st of the reporting year who were members as of December 31 of the reporting year and were continuously enrolled for the reporting year. Members who have had no more than one break in enrollment of up to 45 days during the reporting year should be included in this measure.

Units: **Text:** 0

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Data will be collect through the HCFA reporting system. Information on HCFA dental codes used for this measure are available on pages 92 - 93 of the HEDIS 3.0, Volume 2 - January 1997.

SIGNIFICANCE

The utilization of dental services by Medicaid eligible children has reached a critical level in Kentucky. Many of those children who have services available to them are not using these services. This problem is related to many factors including lack of Medicaid dental providers, inadequate reimbursement rates, client no-shows and a lack of knowledge among parents about the role of preventive care and how to access this benefit.

OBJECTIVE

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 5

PERFORMANCE MEASURE: Decrease the rate of Birth Defect Specific Infant Mortality in Kentucky.

GOAL
